***Election/Restrictions***

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 143-159, drawn to an isolated nucleic acid molecule that is a template for an RNA molecule that comprises a sense sequence and antisense sequence and a cis acting ribozyme where the cis acting ribozyme facilitates the formation of a double stranded RNA. Group I is further restricted to one sequence recited in claim 147.

Group II, claim(s) 160-162, drawn to a method of identifying sequences capable of inducing RNA interference against a target mRNA via specified steps.

The inventions listed as Groups I do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The inventions of Group I and II do not share a special technical feature. The method of Group II does not require the use of the compound of Group I, for example. Furthermore the invention of Group I do not share a special technical feature since each recited sequence of claim 147 is drawn to different dsRNA compounds that either inhibit different targets or inhibit a target to varying degrees where each compound is not necessarily substitutable for another and since the prior art has disclosed nucleic acid molecules that meet the limitations of Group I, see Figure 8c and paragraphs 91, 117 and 214-217 of Symonds et al [US 2002/0160393] cited in applicants IDS filed 10/26/06.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to /Sean R. McGarry/ whose telephone number is (571) 272-0761. The examiner can normally be reached on M-Th (6:00-4:30).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, J. Douglas Schultz can be reached on (571) 272-0763. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
